

FIG. PTP 200-B

CONSTANT

ENGINEERED PIPE SUPPORTS

www.pipingtech.com/ptp200-b

* Drawing shown for down travel

Figure PTP 200-B is a horizontal constant suspended from a beam. It can be furnished with single lug suspension or double lug suspension as shown above.

ORDERING: Specify figure number, size, type, load, actual travel, total travel and direction of travel. For load and travel not in the tables, please call for dimensions.

IMPORTANT NOTES: All dimensions are in inches unless otherwise noted.

- RTO - Rod take out for down travel
- D - J-Rod position for down travel
- E - J-Rod position for up travel
- F - Maximum length for the load range
- M - Maximum height for the load range
- WT - Maximum weight for the load range

J-Rod and Lug Selection
